AIG Successfully closes IPO Offer raising A\$1,526,200

Actcelerate International Group Ltd (**AIG** or the **Company**) (proposed NSX Code: AIG) is pleased to announce that the demand for its initial public offer (IPO) has reached the minimum subscription of A\$1,526,200 under the prospectus (“Offer”). The Company has now closed the Offer after raising A\$1,526,200 from a mixture of existing shareholders and new retail and sophisticated investors from Southeast Asia.

Commenting on successful closing of the Offer, Managing Director Chen Khan Cheong stated that the raising of A\$1,526,200 was a great achievement, and will allow the Company to carry out its business objectives set out in the prospectus.

“My team and I are delighted to receive strong support from diversified high quality investors and we believe a public listing will enhance our presence in Southeast Asia. There is significant growth in Southeast Asia market over the past few years and we know the market quite well. We will take advantage of this to explore more investment opportunities in these regions whilst seeking to deliver sustainable returns to shareholders.” Mr Cheong stated.

The Company is working with the National Stock Exchange of Australia (NSX) on satisfying the remaining conditions for listing, with quotation on the NSX expected to occur in late June, 2018.
